TOURNEYHQ • ORGANIZER AND STAFF GUIDE • OCTOBER 2026

Run a tournament, step by step

Everything an organizer or assistant does in the console, in the order you do it: set up the club, build the tournament, take entries, draw the field, score the day, settle the money and close it out. Screen names and buttons appear exactly as they do in the app, like this: **Add round** .

For the big picture first, read **Help** → **How TourneyHQ works** in the app.

PART 1

Before your first tournament

Sign up

- 1 Go to tourneyhq.club and choose **Sign up** . Enter **Your name**, **Email** and **Password**.

- 2 Answer **What are you organizing golf for?** This sets defaults across the app, such as whether members are shared and whether money is settled between players:
 - **A golf club or course:** member and guest competitions, where the shop takes entry fees and pays winners.
 - **A society, league or regular group:** a season together, sorting money out between yourselves.
 - **A one-off outing with friends:** just this once, with your own list of players.
- 3 Press **Create account** . If anything is missing, the app tells you exactly what.

Club settings

Club → Club settings (or Society settings)

- 1 Under branding, set **Organization name**, an optional **Short name**, and a **Logo** (**Upload an image** or paste a link). Choose **Name beside the logo** and fill in **Where you play**. Press **Save changes** .
- 2 Under colour, pick **Appearance** (Light, Dark or Auto) and a **Colour scheme**. The pairs marked as easiest to read in direct sun are the safest for the course. Press **Save theme** . **Back to default (Tournament)** undoes it.
- 3 Pick your **Currency**. It saves straight away and shows an example amount.

Your colours apply to the console and the public leaderboard. The player app always keeps the TourneyHQ scoreboard look, so it reads the same in sunlight for every club.

Members

Club → Members

- 1 **Add member** : Name, Email (how they sign in), Phone, **Handicap index**, **Handicap is for** (18 or 9 holes), and optionally Member number, GHIN, Home club and private Notes.
- 2 Or bring everyone in at once with **Import CSV** . You'll see how many were added, updated or skipped, and which columns were not recognised.
- 3 To enter members into the open tournament, tick them and press **Add N to <tournament>** .
- 4 Someone who has played can't be removed, only **Set inactive** , so their results stay intact.

A member with no handicap shows **No index yet**, never 0. A blank handicap is not treated as scratch.

Set up → Access & staff (organizers only)

- 1 **Add account** : Name, Email, and a role: **Organizer** (full control), **Assistant** (runs the day), or **Player**.
- 2 To change a role, pick the new one, then confirm with **Yes — make <name> <role>** . Picking alone changes nothing.
- 3 Each organizer or assistant uses one staff seat on your plan. The last organizer on a tournament can't be removed or demoted, so promote someone else first.

PART 2

Create a tournament

Club → Tournaments (or the Choose a tournament screen after signing in)

- 1 Type a name under **Create a new tournament** .
- 2 Choose **How is it played?**: a single round, a series of rounds, or a knockout.
- 3 Choose **Start from**: a template, or one of your past tournaments to copy (settings carry over, scores never do).
- 4 Press **Create tournament** , then **Manage** to open it.

TEMPLATE	WHAT IT SETS UP
Stroke Play	A club championship: cards entered by staff, results hidden until released, one set of tees.
Stableford	A charity or club day: individual net points, public board, players score themselves.
Match Play — round robin	Everyone plays everyone in their flight; players self-score; live board.
Four-Ball Match Play	Pairs, net, public board (a member-guest).
Four-Ball Match Play — round robin	Flights of six pairs playing five nine-hole matches.
Four-Ball	Pairs, better-ball net.
Foursomes / Greensomes	Pairs sharing one ball, net.
Scramble	Four-a-side, net, public board.
Skins	Hole-by-hole pot that carries over.
Four-Ball, foursomes & singles — team cup	Two teams, three sessions, a running cup score.
Set it up yourself	Plain defaults. Everything stays editable whichever you pick.

Tournament details

Set up → [Tournament details \(organizers only\)](#)

- 1 **Tournament name** and **Tournament dates** are required to launch. Tick **These dates are tentative** if they may move; dates have their own **Save dates** button.
- 2 **Overall result:** Match play or Stroke play. This decides how the season-long standings are worked out, not each round's format.
- 3 **Golf course:** pick a course, choose **Other (enter manually)**, or **No fixed course — players choose**.
- 4 Registration: **Entries open**, **Registration deadline**, and **Field capacity** (Fixed number or Open).
- 5 Press **Save event**.

Players & scoring settings

On the same screen, the **Players & scoring card**

- **Who can see the leaderboard:** Organizers only, Organizers and players, or **Anyone with the link**. The last one shows the **Public leaderboard link** with **Copy** and **New link** (the old link stops working at once).
- **Who enters scores:** Organizers and assistants only, or Players may enter their own scores.
- **When players may submit:** During the round, hole by hole; or After the round, as a completed card.
- **How players sign in:** Email and password, Access code on their scorecard, or Either email or access code (see Round codes in Part 3).
- Card confirmation: **Who decides**, and **How many playing partners must confirm** a card.

The **How a tournament runs** panel on the right of Tournament details shows Set up → Launch → Play → Finish, with a NOW marker on your next step.

PART 3

Rounds and formats

Set up → Rounds & formats

Add a round

- 1 Open **Add a round**.
- 2 Pick what the field plays: **Round robin** (everyone in a flight plays everyone), **Stroke play round** (cards, no pairings), or **Team session** (a team cup). Or pick a structure: **Single match** (a play-off or decider) or **Bracket** (knockout).
- 3 **How many?** adds up to 40 identical rounds at once, which is handy for a league season. Set **First round played** and **Then** (for example, weekly).
- 4 Choose the **Format** and **Holes** (18 or 9), then press **Add round**. The line under the button says what will happen, for example "No pairings are drawn — the field returns cards."

Configure a round

- 1 Open the round's card (**Round 1, Round 2...**). Set **Played on**; if it's rained off, change the date here and only this round moves.
- 2 For 9 holes, choose **Which nine**: Front nine, Back nine, or Not fixed (shotgun or mixed). Strokes fall differently on each nine, so scoring waits until this is set.

- 3 If the event uses more than one course, pick the round's **Course**. Handicaps and par then come from that course.
- 4 Under **Customize this round : Result calculation** is Gross, Net or Both. Stableford is always off handicap, so this choice is hidden for it. Also here: how scores are recorded, the **Completion deadline**, the **Scoring window**, the cut (below) and tiebreakers.
- 5 Each format comes with the usual handicap allowance, for example Stroke Play 95%, Four-Ball 90%, Foursomes 50%. Change it per round under **Handicaps for this round**.

The formats

FORMAT	HOW IT'S SCORED	NOTE
Stroke Play	Total strokes	Gross, net or both.
Stableford	Points per hole	Always off handicap.
Modified Stableford	Points, can go below zero	Bigger rewards for birdies and eagles.
Match Play	Holes won	Needs an opponent: use a round robin, single match or bracket.
Nassau	Front, back and overall bets	Needs a head-to-head round.
Skins	Each hole is a prize; ties carry	No finishing position.
Four-Ball	Pairs, better ball	Match play on a head-to-head round, medal on a stroke round.
Best Ball, Shamble	Sides of 2–4, best scores count	Everyone plays their own ball (Shamble from the best drive).
Foursomes, Alternate Shot	Pairs, one ball	50% combined allowance by default.
Greensomes, Chapman / Pinehurst	Pairs, one ball after the drives	60/40 handicap split.
Scramble, Texas Scramble	Sides of 2–4, one ball	Texas has a minimum-drives rule.
Other (scored by hand)	Not scored by the app	Field, tee sheet and messages work; the committee posts the result.

If a format and round type don't fit (for example Stroke Play on a round robin, or Match Play on a stroke play round), the round shows **This round cannot be scored as set**. Change one of them.

Set a cut

- 1 On the round before the cut, under **Before the next round**, tick **Cut the field for Round N**.
- 2 Choose **Top N** or **Top N%**, and **Overall** or **Per flight**. The preview reads "X of Y advance into Round N".

- 3 The cut is made when you mark that round finished. Everyone tied with the last qualifying place also goes through, so a cut to 16 can pass 17 or 18.

Round codes (no accounts needed)

- 1 In Tournament details → Players & scoring, set **How players sign in** to **Access code on their scorecard** or **Either email or access code**.
- 2 Each round gets one code, listed under **Round Codes** with **Copy** and **Reissue**.
- 3 Read it out on the first tee or print it on the tee sheet. Players open tourneyhq.club/play, enter the code and pick their name.

Anyone with the code can report a score for that round. If it spreads beyond the field, **Reissue** it.

What locks after launch

After launch, structural settings lock: format, holes, course, scoring basis, cuts, tiebreakers, deleting rounds and editing the field. An organizer can press **Unlock setup** to correct something. Running the event stays open while locked: you can change a round's date, mark a round over, adjust handicaps, add a round, draw the next round, and change deadlines.

PART 4

The field

Set up → Registration & field

Add players yourself

- 1 Under **Add someone new**: Player name, Email (required or optional depending on sign-in), Mobile if required, **Handicap source** (GHIN, Manual or None), the handicap, and whether it's an 18- or 9-hole index. Press **Add to field**.
- 2 Or **Import CSV** with a header row: a **name** column (or First Name and Last Name), plus email and phone if this tournament needs them. A plus handicap is written "+2.4"; a blank means no handicap, not scratch.

If your list has no email addresses at all, the import switches on Round Codes so players can still get in.

Let players sign up themselves

- 1 Open **Let players sign themselves up** and press **Publish the link**.

- 2 Choose **When someone registers: Auto-confirm to capacity**, or **Approve each entry**. Tick **Require a mobile number** if you want one.
- 3 Share it from **Invite players**: edit the message, then use **WhatsApp** , **SMS** , **Share...** , **Copy message** or **Copy link** .
- 4 Under **Pending approval**, press **Accept** or **Decline** . Over capacity, entries go to the **Waitlist** and are promoted automatically when a place frees up.

Close entries, withdraw players

- **Close registration** , **Reopen registration** and **Follow the deadline again** control the public sign-up only. Staff can always add players by hand.
- Remove someone with × (or select several and **Delete N selected**). A player who has already played is withdrawn instead, and their results are kept.

PART 5

Flights, sides and the tee sheet

Flights

Set up → Flights

- 1 Pick a rule: **Balanced skills**, **Handicap divisions**, **Spread by handicap**, **By seeding**, **Random** or **Manual**.
- 2 Pick **Flight size**: Auto, Set flights, or Players / flight. Handicap divisions on Auto follow the usual club convention: one division under 16 players, two under 32, three from 32 up.
- 3 Press **Generate flights** . If matches have already been scored, you're asked to confirm, because redrawing deletes them.
- 4 Only **Manual** lets you drag players between flights (any other rule would undo it on the next generate). Manual also lets you set tees per flight, and captains.

Teams and pairs (team formats only)

Set up → Teams & pairs

- 1 Type a name and press **Add team** for each side, or press **Draw sides automatically** to balance by handicap.
- 2 Fill sides with **Add player** ; the list shows who is **Not on a side yet**.
- 3 Press **Generate matches** when there are at least two sides.

Tee sheet

The round in play → Tee sheet

- 1 **Who plays together:** Random, Balanced handicap, Balanced skill, Seeded, or By position (available once a round has been played).
- 2 Choose the order off the tee and the group size (2, 3 or 4).
- 3 **Start:** One tee, **Split** (1st and 10th), or **Shotgun** (a group on every hole). Set the **First tee** time and the **Interval**.
- 4 Players' pairing requests are kept together where possible, except in a draw by position. The screen lists any request that couldn't fit.
- 5 Press **Save sheet** to keep a draft, or **Save & publish** and confirm **Publish the tee sheet**.

On publish, each player gets a phone notification, "Your tee time is set" (or "has changed" later), and sees their group on their Today screen. **Unpublish** hides it again without losing the draw. Print scorecards, one per group, from the tee sheet.

PART 6

Launch

- 1 Finish the setup steps the **How a tournament runs** panel shows, including name and dates.
- 2 Press the launch button on the status bar. The confirmation **Launch "<name>"?** summarises dates, course, result, players, flights and rounds, and notes that every non-staff account becomes a Player.
- 3 Press **Launch tournament**. Setup is now locked; see Part 3 for what you can still change.

PART 7

On the day

Before play

- Post a notice in **Tell the field → Announcements**: Title, Message, and **Pin to the top of players' Today screen** if it matters. Announcements show on players' Today screens; they aren't pushed to phones.
- Message a group with **Tell the field → Messages**. Under **Who is this for?** pick everyone at the club, the tournament, players, organizers, a flight, a round, a team, a group, or one person. The caption confirms who it's going to.

How scores come in

- **Players on their phones:** hole by hole or a full card, by tap or by voice ("Say the card"). There's no Save button, and holes are kept on the phone when there's no signal. One phone can keep the whole group's cards (**Me / Group**). Players press **Certify my card** when finished, or **Something on this card is wrong** to flag it.
- **Staff in the console,** at The round in play → Score entry (next).

Enter scores as staff — stroke play

- 1 Choose the round (if there's more than one), then pick the **Player**.
- 2 Enter the card **Hole by hole** or as a **Full card**, or use **Voice entry** ("four, par, birdie, six..."). Press **Save scorecard**.
- 3 Many cards at once: **Import scores** from a spreadsheet. Imported cards wait for approval like typed ones.

Enter scores as staff — match play

- 1 Pick the match from **Matches**. Filter by Not started, Live, Awaiting approval, Final or Disputed.
- 2 Enter it as a **Hole-by-hole result**, a **Full scorecard**, or the **Final result only** (winner and margin, for example 3&2, then **Apply result**). **Enter it a different way** shows the other options.
- 3 A finished match can be **Confirm result** ed or **Dispute** d; an organizer can **Reopen** it. A concession or walkover is recorded with **<Player> concedes**.

Approve cards

- 1 On Score entry, press **Approve N clean cards**. Only approved cards count as results.
- 2 Check the **Needs attention** list (for example "Incomplete — 14 of 18") and use **Approve anyway** where right. An organizer can **Reopen** an approved card.
- 3 For match play, filter to Awaiting approval and press **Approve N shown results**.

The leaderboard

- **Live leaderboard** updates every 30 seconds and shows Live or Final. It adapts to the format: a players board, sides, skins, Nassau, or the bracket.
- For a clubhouse screen or the group chat, set **Who can see the leaderboard** to **Anyone with the link** and share the **Public leaderboard link**. It shows names and scores only.

When things happen

- **Weather:** **Suspend play** , add a reason, then **Suspend play now** . Every player and the public board are told. **Resume play** when ready.
- **Pace of play** (on the Dashboard) shows each group's Thru, Due in, and whether they're on pace or behind, and names groups running late.
- **Wrong scores:** fix the card on Score entry, or use **Clear scores** (organizers) for chosen players or the whole round. Entries, flights and tee times are untouched.

PART 8

Knockouts, team cup and leagues

Knockout (bracket)

- 1 Add a **Bracket** round. If a qualifying round comes first, set the bracket's **Qualification cut**: Per flight (top 1, 2 or 3) or Overall (top N). If the bracket is the first round, the whole field is seeded into it.
- 2 Optionally turn on the **Third and fourth** play-off.
- 3 On **Bracket**, click each match's winner and add the result (for example 3&2 or 1 up). Winners move on automatically. Players can report their own tie results for you to approve.

Team cup (Ryder Cup style)

- 1 On Flights, choose **Manual** and make exactly two flights, named for the two teams.
- 2 Add rounds of type **Team session** (four-ball, foursomes, or singles match play).
- 3 On **Team cup**, set each session's **Lineups** for both teams. Each match is worth a point, or a half each for a halve.

League or season

- 1 Add several Round robin or Stroke play rounds in one go with **How many?** and **Then** (for example, weekly).
- 2 **This week** shows the week's results, standings and skins.
- 3 **Season standings** adds tournaments up across a season, and the **Honours board** keeps your champions (Birdie plan and above).
- 4 A rained-off week: change that round's **Played on** date. A tie decided by a play-off hole: **Record the play-off hole** .

Money

TourneyHQ works the money out and writes it down. It never moves it. There is no payment here. Marking something settled records that a payment happened elsewhere.

Choose how money works

Afterwards → Prizes & payouts → money setup at the foot of the page

- **Costs handled outside the app:** entry fees and prizes happen elsewhere. Skins and side bets are still worked out.
- **Tournament kitty:** one pot. Record money in and money out; nobody owes anybody, so there's no settle-up.
- **Split shared costs:** record who paid for what (buggies, dinner...), and the app works out who pays whom in the fewest payments, with side-game winnings folded in. Choose **Who adds a shared cost:** anyone in the field, or only organizers.

A tournament can **Follow** the club's default, which is set in Club settings.

Prizes

- 1 Under **Add a prize**, start from a structure (such as flight winners) or enter Category, Detail and Amount, then press **Add**.
- 2 Once results are in, pick each prize's **Winner**. The list shows finishing places to help.

Skins

- 1 Set the **Buy-in** and **Holes** (full round, front nine or back nine), then **Save**.
- 2 Mark who has paid in with **Change**, then **Save who paid in**, or press **Everyone with a card**. Players who tapped "I'm in" on their phones appear under **Asked to join**. Press **<Name> — take £X** once their money is in hand.
- 3 The pot shows its arithmetic (entrants × buy-in, skins won, unclaimed). It says **Provisional** until every hole is in.
- 4 **Settling up** lists the payments: "X pays Y £Z".

Side bets

- **Settled by the scores:** low gross, low net, birdies, eagles, The match and Nassau. Set a stake per player. The match and Nassau need a head-to-head round.

- **You name the winner:** closest to the pin, long drive and the like. Choose the bet, the hole and the stake, then **Start this bet** . Pick the entrants, then the winner or winners; a tie splits the pot.
- **Group games** (Afterwards → Group games): a pot for one group or crew only, separate from the field's money. Anyone in that group can set it up.

When money appears

- Results money appears only once the round is final, meaning every card is in or you've closed the round, so nobody sees a figure that can still change.
- Two things show live: each player's stake ("You're in N games... X in"), and a Nassau front or back nine that's already decided.

Settle up

With Split shared costs, the organizer's **The ledger** shows **Where everybody stands** and **To collect and pay out**. Press **Mark settled** as payments happen; **Undo** reverses a mistake. Players see their own figure ("You owe" or "You're owed") on their Money screen.

PART 10

Finish and export

- 1 Approve the last cards, then mark the round over with **Is this round over?** on Rounds & formats. Any cut is made at this moment.
- 2 Award prizes and settle the money (Part 9).
- 3 Export from **Afterwards** → **Reports & export**: **Export CSV** for Full standings and Flight results (or the format's own sheet), attendance (**Who turned out**), the **Bracket sheet**, and **Scorecards**. The right-hand snapshot has a **Print** button for a PDF.
- 4 On Tournament details, press **Complete tournament** . Boards switch to Final standings and the public board to Final.

On the free Par plan, completing a tournament deletes it. The dialog **Complete and delete** "<name>?" offers **Go to Reports** to export first, or an upgrade to keep it. A Par tournament is also removed 14 days after its first round.

Reports & export also has a **Recent changes** log: entries, withdrawals, confirmed results, closed rounds, money in and out.

PART 11

Recipes by event type

The shortest route through the steps above for the events clubs run most.

Monthly medal or Stableford

One day, individual, net.

1. Create a tournament from the **Stableford** or **Stroke Play** template.
2. Set dates and course; publish the sign-up link.
3. Flights: **Handicap divisions**, Auto.
4. Tee sheet: balanced, one tee or split; publish.
5. Players score on their phones; approve clean cards.
6. Award prizes per division; complete and export.

Club championship with a cut

Several rounds; the leaders play on.

1. Template **Stroke Play**; add rounds with How many?.
2. On the round before the cut: Cut the field, Top N (and ties).
3. Leaderboard visible to organizers only until the end, if you want it blind.
4. Mark each round over; the cut happens then.
5. Draw the next round's tee sheet **By position** to send the leaders out last.

Match play league (season)

Everyone plays everyone in their flight.

1. Template **Match Play — round robin**.
2. Add the season's rounds at once: How many? + Then weekly.
3. Flights: Balanced skills; Generate.
4. Players enter and confirm their own matches; approve the rest.
5. Follow This week and Season standings.

Knockout with qualifying

A medal round seeds a bracket.

1. Round 1: Stroke play round. Round 2: Bracket.
2. On the bracket: Qualification cut, Overall Top 8 or 16, or per flight.
3. Optional Third and fourth play-off.
4. Enter winners on Bracket; they advance automatically.

Team cup

Two teams, sessions, a running score.

1. Template **Four-Ball, foursomes & singles — team cup**.
2. Flights: Manual, exactly two, named for the teams.
3. Team session rounds for each session.
4. Set lineups on Team cup; follow the cup score.

Charity scramble

Teams of four, public board, prizes and specials.

1. Template **Scramble**; shotgun start on the tee sheet.
2. Teams & pairs: Draw sides automatically.
3. Leaderboard: Anyone with the link, on the clubhouse screen.
4. Round codes so guests need no account.

Society trip with shared costs

A few rounds away, costs split fairly.

1. Money mode: **Split shared costs**.
2. Players add expenses (green fees, dinner) as they go.
3. Skins and side bets each round.
4. At the end, The ledger lists the fewest payments; Mark settled.

5. Prizes plus "You name the winner" bets (closest to pin, long drive).

Casual round on the first tee

2 to 8 players, one round, maybe a bet.

1. From the Choose screen: **Just playing a round?**
2. Pick the game, players, holes, shots given or not.
3. **Playing for anything?** Skins, Birdie pot, The match or Nassau, for money or "a pint".
4. Choose the course; Start the round. It's deleted about a day later unless kept.

PART 12

Who can do what

SCREEN	ORGANIZER	ASSISTANT	PLAYER
Tournament details, Access & staff, Club settings, Tournaments	Yes	No	No
Members, Registration, Rounds, Flights, Teams, Tee sheet, Announcements, Prizes, Reports, Help	Yes	Yes	No
Dashboard, Leaderboard, Score entry, Bracket, Team cup, This week, Messages, Group games, Rules	Yes	Yes	Yes (their own scores)

A few actions are organizer-only even on shared screens: reopening approved cards, clearing scores, unlocking setup, and replacing public links.

PART 13

Quick fixes

- A button is greyed out

▶ **"Configuration is locked"**

▶ **"This round cannot be scored as set"**

▶ **A player can't find their card**

▶ **No money is showing**

▶ **Handicaps look wrong**

▶ **A shared leaderboard link leaked**

TourneyHQ organizer and staff guide. Written from the app as built on 2 October 2026; button names match the screens. Questions and corrections: tell the TourneyHQ team.
